AntimatterAI

Why $60M — And Not Higher (or Lower)

The Mathematical Case for a Category-Defining Series A

CONFIDENTIAL — FOR QUALIFIED INVESTORS ONLY

March 2026

THE ELEVATOR PITCH

AntimatterAI has built what would cost $34M–$64M to duplicate — seven production products, Fortune 500 clients, the only 25/25 vendor matrix score in the industry — all without a single dollar of outside capital.

At $60M pre-money, you are buying IP at or below replacement cost in a market growing 42% CAGR.

The first 3–5 MRR subscribers post-funding will re-rate this company toward $100M+ almost immediately.

$60M	7	$4M+	25/25	$0
Pre-Money	Products	Pipeline	Vendor Score	Prior Dilution

WHY $60M AND NOT HIGHER

The Ceiling Is Compressed By One Factor Alone

Pre-revenue status is the **ONLY** reason this is not a $200M+ valuation. Every comparable AI company at similar technical depth and market positioning has raised at multiples far exceeding our ask.

Company	Valuation	Stage	Focus	Key Metric
Abridge	**$5.3B**	Series E	Clinical docs AI	Healthcare NLP leader
Sierra	**$10B**	Series C	Enterprise agents	$100M ARR in 7 quarters
Cognigy	**$955M**	Acquisition	Enterprise AI agents	25.8x ARR multiple
Harvey	**$11B**	Series D	Legal AI	$190M ARR
Distyl AI	**$1.8B**	Series B	Enterprise F500	5x revenue growth
Hebbia	**$700M**	Series B	Enterprise knowledge	54x ARR ($13M ARR)
Glean	**$7.25B**	Series F	Enterprise search	Work AI platform

Every single one of these companies had contracted ARR. A standard **30–50% pre-revenue discount** to comp-implied multiples lands us at **$60M–$80M**. This is not a hype number — it is the math.[1]

1. Comp data: PitchBook, Crunchbase, Reuters, TechCrunch — 2024–2026 rounds

WHY $60M AND NOT LOWER

The Floor Is Supported By Genuine IP Depth

Independent cost-to-duplicate analysis places AntimatterAI's IP portfolio at **$34M–$64M** in total replacement cost.

IP Asset	Description	Replacement Cost
ATOM Framework	Full-stack model-agnostic AI platform, 25/25 vendor matrix	**$15–25M**
GenUI Engine	Generative UI — exclusive capability, no competitor offers this	**$8–12M**
ClinixAI RCM	Healthcare AI with full X12 coverage, 78% doc time reduction	**$10–18M**
MoleculeAI	Quantum-classical hybrid drug discovery platform	**$5–10M**
ATOM Voice	Empathic voice agents built on Hume EVI	**$3–5M**
ATOM Browser	AI-native browser with deep agent integration	**$4–7M**
TOTAL REPLACEMENT COST		**$34M – $64M**

At $60M, investors are buying the IP at or near replacement cost — in a market growing **42% CAGR**. That is a mathematically compelling floor.[1]

Independent IP audits increase valuation multiples by **15–20%**.[2] Our IP portfolio represents 3+ years of engineering across 7 distinct products.

1. Market CAGR: MarketsandMarkets Agentic AI Report 2025
2. IP audit impact: Lucid International IP Valuation Research, 2026

THE RE-RATING CATALYST

First Revenue = Immediate Re-Rating

The first 3–5 MRR subscribers post-funding will re-rate the company toward $100M+ almost immediately.

Scenario	Metric	Value
MRR Target	5 enterprise customers at avg. $100K/mo	**$500K MRR**
Annualized	$500K × 12 months	**$6M ARR**
Multiple Range	Market median for enterprise AI (2024–2026)	**20–30x ARR**
Implied Valuation	$6M ARR × 20–30x multiple	**$120M–$180M**

This is not speculation. The AI revenue acceleration curve is unprecedented:[1]

- **Manus** hit $100M ARR in 8 months
- **Sierra** hit $100M ARR in 7 quarters
- **Lovable** hit $100M ARR in 8 months

With $4M+ ClinixAI pipeline already in hand, the path to first MRR is measured in weeks, not years.

1. Revenue milestones: Sacra, TechCrunch, The Information — 2024–2026 reports

THE PRODUCT ARSENAL

Seven Products. Three Verticals. Zero Competition at This Depth.

1. ATOM Enterprise [ENTERPRISE AI]

Full-stack model-agnostic AI framework achieving the only perfect 25/25 vendor matrix score in the industry. Enterprise-ready with production deployments.

2. ClinixAI [HEALTHCARE AI]

Healthcare AI platform with full X12 EDI coverage, delivering 78% physician documentation time reduction. $4M+ qualified pipeline in hand.

3. MoleculeAI [BIOTECH / PHARMA]

Quantum-classical hybrid drug discovery platform reducing early-stage discovery timelines from years to weeks.

4. Vidzee [MEDIA / STREAMING]

AI-powered streaming marketplace reimagining content discovery and delivery through intelligent curation.

5. ATOM Voice [VOICE AI]

Empathic voice agents built on Hume EVI architecture — emotionally intelligent, context-aware conversational AI.

6. ATOM Browser [AGENTIC AI]

AI-native browser with deep agent integration for autonomous web tasks and enterprise workflows.

7. GenUI [EXCLUSIVE]

Generative UI engine — exclusive capability with no competitor equivalent. Dynamic interface generation from natural language.

Any ONE of these products would justify a standalone funding round.

THE MOAT

Why No One Can Catch Us

#	Moat Layer	Detail	Time to Replicate
1	**Technical IP**	25/25 vendor matrix score, GenUI exclusivity — no competitor has achieved either	**18–36 months**
2	**Data Network Effects**	Every deployment enriches agent performance across the platform — compounding advantage	**12–24 months**
3	**Switching Costs**	Deep enterprise integrations with custom workflows, data pipelines, and compliance configurations	**6–12 months**
4	**Partnership Lock-in**	Strategic partnerships with Akamai (infrastructure) and Stedi (healthcare EDI)	**12–18 months**
5	**Talent Density**	100+ years combined experience across AI, enterprise software, and healthcare technology	**Ongoing**

A competitor would need $34M–$64M AND 3+ years AND the team to replicate what exists today.

THE MARKET OPPORTUNITY

Trillion-Dollar TAMs Across Every Vertical

Market	Current Size	Projected Size	CAGR	Source
Agentic AI	$6.95B (2025)	$57.4B (2031)	**42%**	MarketsandMarkets
Enterprise AI Platforms	$13B (2024)	$50.3B (2030)	**25%+**	Gartner / IDC
Healthcare AI	$8.1B (2024)	$22.5B (2030)	**18.5%**	Grand View Research
Global AI Spend	$2.52T (2026)	—	**44% YoY**	Gartner
Data Center Capex	$2T+ (2025)	$5.2T (2030)	**—**	McKinsey

AntimatterAI sits at the intersection of ALL of these TAMs.
Enterprise AI (ATOM) + Healthcare AI (ClinixAI) + Drug Discovery (MoleculeAI) + Media (Vidzee) = multi-vertical exposure to the largest technology shift in history.

1. MarketsandMarkets | 2. Gartner IT Spending Forecast 2025 | 3. McKinsey Data Center Analysis

MRR SUBSCRIPTION MODEL

The Rule of 78 — Compounding Revenue Architecture

ATOM Enterprise Pricing Tiers

Tier	Monthly Price	Target Segment
Starter	**$8,500/mo**	Mid-market companies, initial AI deployment
Pro	**$25,000/mo**	Enterprise teams, multi-agent workflows
Enterprise	**$65,000/mo**	Large enterprise, full platform access
Sovereign	**$125,000/mo**	On-premise / air-gapped, regulated industries

ClinixAI Pricing Tiers

Tier	Monthly Price	Target Segment
Solo Practice	**$1,500/mo**	Individual physician practices
Group Practice	**$5,000/mo**	Multi-physician groups
Network	**$15,000/mo**	Regional health networks
Enterprise	**$35,000/mo**	Hospital systems, large IDNs

THE RULE OF 78

Adding **$200K new MRR per month** (conservative with our pricing tiers):

Month 1: $200K | Month 2: $400K | Month 3: $600K … Month 12: $2.4M MRR

Year 1 Cumulative Revenue = $15.6M (not $2.4M!)
Because each new subscriber pays *every month* for the remainder of the year.

Subscription revenue commands **8–12x ARR multiples** vs 1–3x for one-time revenue.

THE TEAM

Built, Not Bought

Name	Role	Background
Ben O'Leary	Co-Founder & Strategic Architect	Enterprise AI strategy, Fortune 500 relationships. Architected the go-to-market and product strategy across all seven product lines.
Paul Wallace	Co-Founder & CTO	Enterprise technology veteran. Full-stack AI architecture. Led development of the ATOM framework and core platform engineering.
Matt Bravo	Co-Founder, Design & Technology	Product design and UX. Responsible for GenUI engine and cross-platform user experience architecture.

Enterprise Client Relationships

Lowe's	**Cognizant**	**Trimble**	**E2open**
Toyota	**OWASP**	**Injazat**	

100+ years combined team experience. Every dollar of value created on founder capital alone.

COMPARABLE TRANSACTIONS

The Evidence — 10 AI Companies, Billions in Valuation

Company	Round	Valuation	Focus	Key Metric
Sierra	Series C	**$10B**	Enterprise agents	$100M ARR in 7 quarters
Harvey	Series D	**$11B**	Legal AI	$190M ARR
Cognition AI	Series C	**$10.2B**	AI coding agent (Devin)	AI developer tools
Glean	Series F	**$7.25B**	Enterprise search	Work AI platform
Cohere	Series D	**$5.5B**	Enterprise LLM	Enterprise-focused models
Abridge	Series E	**$5.3B**	Clinical docs AI	Healthcare NLP
Writer	Series C	**$1.9B**	Enterprise gen AI	Full-stack gen AI
Distyl AI	Series B	**$1.8B**	Enterprise F500	5x revenue growth
Cognigy	Acquisition	**$955M**	Enterprise AI agents	25.8x ARR
Hebbia	Series B	**$700M**	Enterprise knowledge	54x ARR, $13M ARR

Median revenue multiple: 25–50x ARR. AntimatterAI at $60M pre-revenue = buying the floor.

THREE SCENARIOS

The Investor's Math — Conservative to Bull Case

CONSERVATIVE

$30M ARR Y2

15x Multiple

$450M

7.5x Return

BASE CASE

$50M ARR Y2

20x Multiple

$1B

16.7x Return

BULL CASE

$80M ARR Y2

30x Multiple

$2.4B

40x Return

Metric	Conservative	Base Case	Bull Case
Year 2 ARR	$30M	$50M	$80M
ARR Multiple	15x	20x	30x
Implied Valuation	**$450M**	**$1B**	**$2.4B**
Return on $60M Entry	**7.5x**	**16.7x**	**40x**
IRR (3-year hold)	~96%	~155%	~250%+

Even the CONSERVATIVE case delivers top-decile venture returns. The base and bull cases represent generational fund-maker outcomes.

WHY NOW

The Timing Thesis — Three Forces Converging

1. ENTERPRISE AI INFLECTION

33% of enterprise software will include agentic AI by 2028 (Gartner).[1] Enterprises are actively seeking production-ready platforms — not science projects. AntimatterAI's 7 production products and 25/25 vendor matrix position it as the platform of choice.

2. HEALTHCARE AI REGULATORY TAILWIND

CMS mandating prior authorization automation by 2026.[2] ClinixAI's full X12 EDI coverage makes it one of the few platforms that can deliver compliance-ready automation. The $4M+ pipeline reflects real demand from healthcare organizations that must comply.

3. CAPITAL MARKET TIMING

AI Series A rounds up 180% YoY.[3] Global AI spend reaches $2.52T in 2026 (Gartner). Capital is flooding into AI — but overwhelmingly into companies with less technical depth. AntimatterAI offers a rare combination: pre-revenue pricing on production-ready technology.

"The window to invest at pre-revenue pricing in a production-ready platform closes the moment the first contract signs."

1. Gartner Agentic AI Predictions 2025 | 2. CMS Prior Auth Final Rule CMS-0057-F | 3. Gartner IT Spending 2025

THE ASK

Series A: $10–20M at $60M Pre-Money

SERIES A TERMS

Raise Amount: $10–20M | **Pre-Money Valuation:** $60M | **Prior Dilution:** $0

Use of Funds

Category	Allocation	Focus Areas
Engineering	35%	Core platform, new product features, AI/ML infrastructure, scalability
Sales & GTM	30%	Enterprise sales team, marketing, channel partnerships, demand generation
Infrastructure	15%	Cloud/compute, Akamai partnership, data center optimization
Customer Success	10%	Implementation, onboarding, enterprise support, account management
G&A	10%	Operations, legal, finance, compliance, IP protection

At $60M, you get:

- **7 production products** at or below replacement cost
- **Fortune 500 enterprise relationships** — Lowe's, Cognizant, Trimble, Toyota
- **$4M+ qualified pipeline** with ClinixAI healthcare customers
- **Zero prior dilution** — clean cap table, maximum alignment
- **A team that built everything on their own dime** — proven execution

THE FINAL WORD

Companies with ONE product, in ONE vertical, with LESS technical depth are raising hundreds of millions at billion-dollar valuations.

AntimatterAI has SEVEN products across THREE high-value verticals with ZERO dilution.

The question isn't whether $60M is the right number.

The question is how long this entry point remains available.
